

**THE PRESERVE ON ANASTASIA ISLAND
NEWSLETTER
August 2023**

Monday, August 14 at 9am through Thursday, August 17: Village Key and Alarm will be doing their annual inspections of the fire alarm systems in every building. Notices will be distributed to all units as the date gets closer. The inspections usually end around 1pm each day.

Monday, August 21: A1A Pressure Washing will begin pressure washing ALL buildings and continue until finished. Note: The pressure washing will take at least two weeks. All windows must be closed and all plants and decorations must be removed to avoid impeding progress. It also may be best to park away from the buildings being worked on. A more specific schedule of the building numbers and the day for each will be provided as the time approaches.

AC Drain Lines: Our AC's are working overtime in this heat and humidity. Please keep your drain lines clear at a minimum of twice a year.

Dryer Vents: Please make sure you are checking your dryer vents, this can be a fire hazard to the entire building.

Friendly Reminder: It's summer and a great time to review the pool "Rules and Regulations" to avoid possibly being fined and ruining the enjoyment of the pool for all.

Looking Ahead: The next Board meeting is Wednesday, September 6, 2023 at 6pm in the Preserve clubhouse.
